

DEZENT TE

Active elegance

The new alloy wheel DEZENT TE

The design competence and know-how of the traditional German manufacturer DEZENT have really come into their own in the new alloy wheel TE. Specially designed for modern SUVs like, for example, the Porsche Cayenne, the popular BMW X-models (X1, X3, X5) or the Hyundai Santa Fe, the wheel's powerful design is based upon its large tyre load. The DEZENT TE is also most suitable for modern vans, convenient and chic estate cars and elegant limousines. The 17 and 18-inch wheels "made in Germany" are robust down to their last detail and thus ready for winter. Because of a special clear-lacquer they will withstand all the snow, slush or road salt out on the streets.
