

DEZENT TB DARK

TB like “totally black” or “typically BMW”

The new black winter alloy wheel DEZENT TB dark

If you want to prove that black really suits a BMW, you just have to keep in mind the legendary “Shadow-Line” design, once a special option for many models. The German traditional brand DEZENT has therefore designed a new, dark alloy wheel, the TB dark, which is customised for the cars from Munich in both visual and technical terms. Thanks to the salt-spray-tested clear lacquer coating, this high-quality wheel is ideal for winter and keeps the sporty look, even in the cold season. The DEZENT TB dark is also tyre-chain-compatible and comes with a three-year warranty.
