

# DEZENT TD DARK

## Ready for winter

### The brand new black DEZENT TD

Matching a lot of different vehicles, the DEZENT TD dark alloy wheel is a real “all-rounder”. It is the right choice for a city car like the VW up or Škoda Citigo as it is for a Golf VII or for compact SUVs like the Hyundai ix35 and Audi Q3. And just as it befits a modern wheel classic, it is roadworthy all year round, regardless of its finish. The silver-effect paint makes for an interesting play with lights, while the matt-black variant forms an attractive contrast with ambient lighter shades. It harmonises with the latest colours for cars, but is also perfectly suitable in “Winter wonderland”. And it is robust, too: with its clear-lacquer coating, the DEZENT TD withstands all snow, slush and road salt out there.
