

DEZENT TB

TB as in “typically BMW”

The new DEZENT winter alloy wheel

BMW drivers have always liked sport-type accessories. But these also always have to be in line with this particular brand’s character. The traditional German manufacturer DEZENT has therefore now come up with its TB, a new, brand-specific alloy wheel that in its design and technology is simply “Typically BMW”. Stylish even in winter, the robust wheel has a salt-spray-tested clear-lacquer coating, is tyre-chain-compatible and comes with a three-year guarantee.

In technical terms, the DEZENT TB has been customised for the BMW 1 Series, X1, 3 Series, X3, Z4, 5, 6 and 7 Series models and follows the “plug & play” motto.
