

DEZENT TM

Top alternative for Mini Cooper drivers

The DEZENT TM alloy wheel – plug & play thanks to ECE

Ten blunted spokes and a slim centre: you can see at first glance that the silver-painted DEZENT TM was designed for Mini Coopers. The convex struts feature a central ribbing, creating another lightstep. The DEZENT TM combines traditional and modern styling elements and thus magnificently bridges elegance and sportiness. But its technology is also great: thanks to its ECE approval and an engraved type number you can simply plug & play!
