

## DEZENT TC DARK

**Cool and trendy all year Long**

**A very special alloy wheel: DEZENT TC dark**

The look of the DEZENT TC dark is characterised by five double spokes that stretch into the rim flange in a curved way. This curve starts at the centre comparatively gently, before it then gets more pronounced toward the outer edge and thus underscores the sportiness of the TC dark. The spokes polished front contrasts with the black inside surfaces and the dark rim well. This makes for a perfect interplay of all surfaces and edges and the wheel always appears one dimension larger than it really is. The discreetly open design is worked out by an attractive colour combination, which, underscores the wheel's energetic character.
